

**KIDS for  
the BAY**

CELEBRATING **25** YEARS

## Watershed Rangers Program 2017-2018 Highlights

"I loved studying the maps at the beginning of the lesson. It helped me understand my watershed."

Ezra, Second Grade Student,  
Franklin Elementary School

"I learned to throw away trash so animals will not eat it and choke. Turtles sometimes eat plastic bags because they think it's a jellyfish!"

Ella, Third Grade Student, Paden Elementary School

"I loved the Zero Waste Lunch game because it helped me learn how I can make a Zero Waste Lunch every day. If I make a Zero Waste Lunch every day, I can reduce, reuse, and help my environment!"

Victoria, Second Grade Student,  
Franklin Elementary School

City of Alameda  
**Public Works  
Department**  
Public Works *Works for You!*

Prepared for City of Alameda, June 2018

"I can be an environmentalist by using less trash and less plastic"  
Kent, Third Grade Student, Henry Haight Elementary School

"Today I learned that animals can get hurt by trash, so it's important to pick up trash on the beach!"  
Callie, Fourth Grade Student, Wood Middle School

"80% of ocean trash is plastic, and many marine animals die from eating or choking on trash!"  
Kiely, Third Grade Student, Ruby Bridges Elementary School

"I am inspired to become a scientist to investigate how to decompose plastic waste faster so that it doesn't stay in the ocean for hundreds of years!"  
Yonidhi, Fifth Grade Student, Wood Middle School

"We should all use reusable things instead of plastic. I can be an environmentalist by searching for garbage around the whole world!" Sophie, Third Grade Student, Earhart Elementary School
