

**KIDS for  
the BAY**  
Environmental education through action

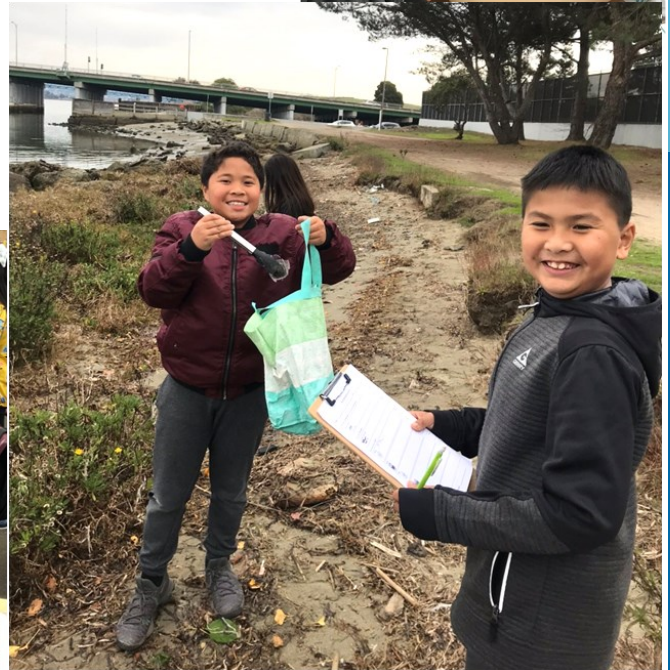

# Watershed Rangers Program 2018-2019 Highlights

"I learned that we should take care of the environment better, because we all share the same world. We can take better care of the environment."  
Michael, Ruby Bridges Elementary School

"Today I learned that saltwater and freshwater come together in the bay to make an estuary!"  
Bradley, Henry Haight Elementary School

"I learned that we should not throw trash in the storm drains or else sea animals die because the water makes its way to the bay from our streets, the watershed is all connected."  
Alondra, Ruby Bridges Elementary School

City of Alameda  
**Public Works  
Department**  
Public Works Works for You!

MEMBER OF  
  
**cleanwater**  
PROGRAM

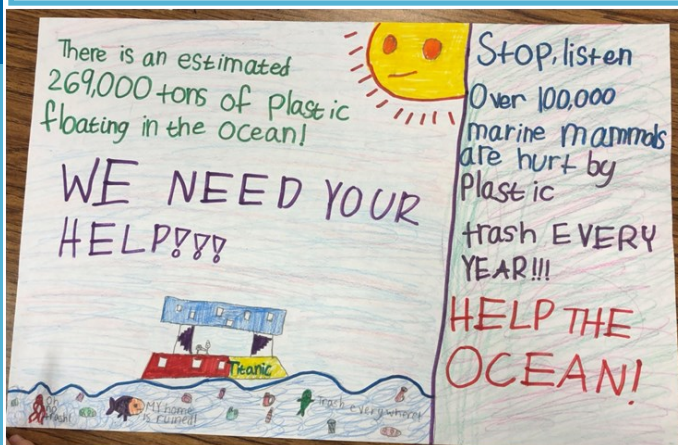

"I learned that we waste more than we think. I liked when we checked the total amounts of each type of trash on the chart and graph."

Gracyn, Earhart Elementary School

"I think it's really important that kids know they can do something about this problem. My poster says 'Good News! You can help!' because we can make changes to help the animals." Ayanna, Henry Haight Elementary

"I can prevent pollution by using the Five Rs (Reduce, Reuse, Recycle, Rot, Refuse) and try to use less plastic, because it can take many years to break down and it releases harmful chemicals."

Lam, Third Grade Student, Maya Lin Elementary School

"I found trash in the field. Like a scientist, I made sure to record each piece!"  
Arthur, Edison Elementary School
