

Walnut Creek Field Trip Explorations

KIDS for the BAY would love to lead your class on a Creek Field Trip to explore and investigate the unique plants and animals that make the beautiful Civic Park environment their home. This Field Trip teaches Next Generation Science Standards in an exciting three-hour outdoor program with an experienced KIDS for the BAY Instructor.

In hands-on investigations, students will:

- study the pathway of Walnut Creek,
- investigate California native plants,
- identify terrestrial invertebrates,
- play nature games,
- create environmental art, and
- complete a trash clean-up project.

**"I have discovered
a new invertebrate!
It has so many legs.
Everyone come look!"**

— Grace, Fourth Grade
Student, Eagle Peak
Montessori, Walnut Creek

**"I think the new Field Trips that KftB
has designed are phenomenal! They
are a perfect combination of science,
games, and art and my students
have learned a ton about their local
habitat. We'll keep signing up for
these, year after year!"**

— Deborah Walker, Science Teacher, Buena
Vista Elementary School, Walnut Creek

Location: Walnut Creek Civic Park
Grade Level: Kindergarten – Fifth Grade
Time: 9:30am – 1:00pm
